Work Experience

IT Intern

June - August 2025

EVN Macedonia, Skopje

- Built and tested front-end features for the company website using ReactJS, working closely with the team to improve the overall user experience.
- Collaborated on code analysis and optimization, gaining practical experience with agile processes.

Residential Engagement Assistant

Feb 2025 - May 2026

Constructor University, Bremen

- Organized and executed events for over 50 participants, managing budget, logistics, and coordination across multicultural teams.
- Provided daily communication and support to students, resolving a wide range of questions and concerns.

Volunteer Experience

Student Mentor

Sept 2024 - May 2025

Constructor University, Bremen

- Welcomed and supported incoming students through housing and adjustment to a new environment.
- Organized student events and campus/city tours.

Projects

Project Management Web App

2024

Team Project (10 members)

- Developed a practical and intuitive front-end interface for the platform.
- Organized and coordinated tasks across a large team.

Human-Computer Interaction Project - Surplus Food Delivery App

2025

Team project (5 members)

- Conducted research (interviews and surveys) to understand user needs and behavior.
- Designed the interface and interactive prototype in Figma.

Thesis Project: "The impact of Gestalt Principles on UX in Web Interface Design"

2026

Independent Project

- Researched and analyzed user experience by applying Gestalt principles to a web interface design.
- Conducted experiments and user testing to evaluate intuitiveness, comprehension speed, and workflow ease.
- Built both versions of the website from scratch.

AI Chatbot

2026

Class Project

- Built a full-stack chatbot application using Cursor AI, with a backend integrating an LLM API to generate responses
- Designed the front-end interface for real time conversation with the AI

Education

B.Sc. Computer Science, Minor in Psychology
Constructor University, Bremen, Germany

Sept 2023 - June 2026

- Relevant coursework: Software Engineering, Algorithms and Data Structures, Human-Computer Interaction, Operating Systems, Cognitive Psychology.
- Applied psychological principles to better understand user behavior and user experience

Awards
